

FLOW MEASUREMENT

www.valoraz.com.my

With a provision of flow measurement services, process operators can manage the risk of inaccuracy inherited by any measurement or process flow validation systems. Through our method of clamp-on flow measurement, clients do not need to shut down the process or worry about any intrusive elements into the process while achieving good accuracy of flow measurement. As the flow measurement is portable, the services is flexible and can be performed to measure flow in almost all locations along the process line to support any flow measurement audit initiatives.

Why Measure Flow?

- ▽ For better control and monitoring of process
- ▽ Process line flow validation & Audit
- ▽ Flow meter verification

Where can it be applied?

- ▽ Waterworks
- ▽ Power Plants
- ▽ Petrochemical Plants
- ▽ Refinery Plants
- ▽ General Industries

Example of measurable liquids

- ▽ Raw Water
- ▽ Treated Water
- ▽ Chilled Water
- ▽ Sea Water
- ▽ Hot Water
- ▽ Oil
- ▽ Others
